They're still the same group of kids, but a few of them have aged out of their high school. All of them are going to college and are facing the first year of what they've been told will be their "adult life." PG-13 for strong sexual content, language and some violence. Where is it better to go to college? Old Dominion or Princeton? College or the military? You'll have to see the movie to find out.Effects of testosterone on the long-term degradation and biocompatibility of polyurethane ureteral stents. Numerous studies have indicated that subcutaneously implanted polyurethane catheters are potentially non-immunogenic and have good biocompatibility. However, a short clinical use time is often an unresolved problem. We therefore investigated the effect of testosterone on the degradation and biocompatibility of a polyurethane ureteral stent. A 12Fr Percuflex(®) tunneled ureteral stent containing polyurethane was implanted in the transperitoneal part of the ureter, wrapped around a double-J stent, in Sprague-Dawley rats. After a successful creation of the stoma, the rats were injected with either 50 µg testosterone (or carrier solution) daily for 21 days. The implants were explanted, and the terminal amino groups were analyzed by high-performance liquid chromatography (HPLC) and the metabolites by thin-layer chromatography (TLC). A microscopic evaluation was performed
